

Update notes 10.13.005

1. Down arrow in current Rx selects first row (drug) in the grid- previously went to date.
2. Hotkeys for extra nodes in Clinical Profile, eg Pap smear, measurements
3. "Print drug sheet" error in the Instruction line if left blank- now fixed
4. **Print** patient notes now uses full width of page when printing rather than narrow columns
5. Authority number on scripts is now AUTOCAPITALIZED
6. Change of name in remote support under the Help menu to "Remote Support"
7. Resolved problem of not being able to view occasional correspondence files by using a system image viewer
8. Letter writer. "Share all" now fixed
