

Update Notes for Version 20.14.04

System changes

- 1. Pathology and Radiology results download now visible in the Clinical Profile.
Result is cleared from the Inray when actioned in the Clinical Profile.**
- 2. New System setting to restrain a prescribing IF Allergies not checked.
Administration>Settings>System Preferences (Clinical Tab)**
- 3. Enable Multilocation for Providers. A Provider can now have more than one provider number (ie work from more than one location)**
- 4. Notes can now be coloured. Select the notes, then R click to set a colour.**
